

# Enterprise Class Telephony For a Small Monthly Rental

## Outsourced Telephony Services *Mobile VoIP now supported!*

CloudPBX is a fully featured, hosted IP-PBX service leveraging best-of-breed Linux virtualisation and IP-PBX switching technologies. CloudPBX is based on the powerful Asterisk IP-PBX switching software. The CloudPBX feature set combined with its low cost of ownership makes for a superior business telecom solution compared to traditional premise-based PBX systems using older TDM technology.

Our **CloudPBX Base Service** includes integration with IP desk phones only, where our **CloudPBX Extended Service** includes IP desk phones, mobiles phones, softphones for Windows and Mac's as well as end-point management for all IP desk phones.

In addition, Cloud Solutions offers virtual phone numbers in over 50 countries and low cost long-distance calling over premium SIP Trunks.

We aim to be the premier solutions provider for hosted IP-PBX systems in Asia.

### CloudPBX Benefits Include:

- Remote workers and branch offices can connect to a single telephone system so all calls become internal
- Works with smart phones such as iPhone and Android via preconfigured and secure SIP client
- Offers business disaster recovery when the PBX is hosted outside of your office
- Virtual numbers from Singapore, Hong Kong, Beijing, Malaysia etc can be connected for incoming calls
- Low cost long distance calls from less than US\$0.02 cents per minute
- HD Voice supported providing crystal clear voice quality, far superior to traditional telephone systems

Moreover, because your CloudPBX is hosted in the cloud, you no longer have to buy or maintain any physical hardware or hire an IT person to staff it. Just plug your configured phones into the Internet and start answering customers' calls. It is that simple! We ship your IP phones directly to your office and manage them via our CloudPBX Extended package.
